Allowable Subject Matter

3. Claims 4-7 are allowed.

4. The following is an examiner's statement of reasons for allowance:

Regarding claim 4, Oberschmidt et al. (USP 6507321 B2) discloses a broadband slot antenna, comprising: a dielectric layer under which microstrip feedline is formed; ground formed on the dielectric layer and coupled with the microstrip antenna electromagnetically through a slot; and reflection plane placed under the microstrip feedline in order to prevent board surface waves from being radiated and enhance antenna gain. Oberschmidt, however, fails to teach a baffle layer formed on the ground conductor in order to prevent mutual coupling between the slot antennas. In addition, the art does not suggest the addition of a baffle layer for preventing mutual coupling between the slot antennas of a slot array antenna.

Claim 5-7 are allowed for depending on claim 4.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
